REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
    Output: Forward Playlist: a b c
    Backward Playlist: c b a
    Answer
    #include <stdio.h>
    #include <stdlib.h>
    struct Node {
   char item;
      struct Node* next;
      struct Node* prev;
    }:
    // You are using GCC
    void insertAtEnd(struct Node** head, char item) {
      //type your code here
      struct Node*newnode=(struct Node*)malloc(sizeof(struct Node));
      newnode->item=item;
      newnode->next=NULL;
      newnode->prev=NULL;
*head==NULL){

*head=newnode;

return;
```

```
struct Node*temp=*head;
        while(temp->next!=NULL){
          temp=temp->next;
        temp->next=newnode;
        newnode->prev=temp;
    void displayForward(struct Node* head) {
      //type your code here
      struct Node*temp=head;
      while(temp!=NULL){
         printf("%c ",temp->item);
        temp=temp->next;
      printf("\n");
    void displayBackward(struct Node* tail) {
      //type your code here
       struct Node*temp=tail;
      while(temp!=NULL){
         printf("%c ",temp->item);
         temp=temp->prev;
      }
      printf("\n");
 void freePlaylist(struct Node* head) {
       //type your code here
       struct Node*temp;
      while(head!=NULL){
         temp=head;
         head=head->next;
         free(temp);
      }
    }
    int main() {
char item;
      struct Node* playlist = NULL;
```
