Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Ravi is developing a student registration system for a college. To efficiently store and manage the student IDs, he decides to implement a doubly linked list where each node represents a student's ID.

In this system, each student's ID is stored sequentially, and the system needs to display all registered student IDs in the order they were entered.

Implement a program that creates a doubly linked list, inserts student IDs, and displays them in the same order.

Input Format

The first line contains an integer N the number of student IDs.

The second line contains N space-separated integers representing the student IDs.

Output Format

The output should display the single line containing N space-separated integers representing the student IDs stored in the doubly linked list.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: 5
    10 20 30 40 50
Output: 10 20 30 40 50
    Answer
    // You are using GCC
    #include<stdio.h>
    #include<stdlib.h>
    struct node{
      int data:
      struct node*next;
      struct node*prev;
    };
    void list(struct node**head,int n){
   struct node*temp;
      for(int i=0;i<n;i++){
         int data;
         scanf("%d",&data);
         struct node*newnode=(struct node*)malloc(sizeof(struct node));
         newnode->data=data:
         newnode->next=NULL;
         newnode->prev=NULL;
        if(*head==NULL){
           *head=newnode;
           temp=newnode;
2410010 Nelse{
           temp->next=newnode;
           newnode->prev=temp;
```

```
247901045
                                                   24,190,104,5
        temp=newnode;
    void display(struct node*head){
      struct node*temp=head;
      while(temp!=NULL){
        printf("%d ",temp->data);
        temp=temp->next;
      }
    int main(){
                                                                             241901045
      int n;
scanf("%d",&n);
list(&head n)
      struct node*head=NULL;
      display(head);
      return 0;
    }
```
